

USER PERSONAS REPORT

Online Learning Platform

Name	Yashika Shri P
Register Number	261CB025
Class	BCA
Date	17.08.2026

1. Aim

To create user personas for an online learning platform by identifying different types of learners, their goals, behaviours and pain points. Personas help designers understand users and create a more personalized learning experience.

2. Introduction

An online learning platform serves learners with different backgrounds, schedules and career goals. Creating user personas helps the UI/UX design process focus on real user needs instead of treating every learner in the same way.

3. User Persona 1 – The College Explorer

Profile	Ananya, 19, College Student, Beginner–Intermediate, Mobile user
Goals	Learn practical skills; earn certificates; improve academic performance; build a strong resume; explore career options
Behaviors	Studies mostly at night; prefers short videos and quizzes; saves useful lessons; has limited time during exams
Pain Points	Long courses are difficult to finish; gets distracted easily; needs simple navigation and engaging content

4. User Persona 2 – The Career Switcher

Profile	Rahul, 27, Working Professional, Intermediate, Laptop user
Goals	Move into a tech role; learn job-ready tools; complete courses efficiently; build portfolio projects; prepare for interviews
Behaviors	Learns after work; prefers structured learning paths; checks course reviews before enrolling
Pain Points	Limited study time; unclear course paths; needs career-focused guidance and practical projects

5. User Persona 3 – The Busy Professional

Profile	Meera, 34, Professional & Parent, Intermediate–Advanced, Mobile + Laptop
Goals	Stay updated; learn at her own pace; gain advanced skills; apply learning at work; maintain work–life balance
Behaviors	Learns in short sessions; uses reminders and bookmarks; returns to unfinished lessons
Pain Points	Unexpected interruptions; long sessions are hard to complete; needs flexible and accessible learning

6. Persona Comparison

Persona	Main Goal	Key Behaviour	Main Pain Point
Ananya	Explore & improve	Short, visual learning	Limited time and attention
Rahul	Career transition	Structured learning	Unclear learning path
Meera	Professional growth	Flexible micro-learning	Lack of uninterrupted time

7. Design Recommendations

The platform should provide personalized learning paths, micro-learning options, progress dashboards, smart reminders, offline access, certificates, quizzes and career-focused guidance. The interface should adapt to the learner's goals, schedule and experience level.

8. Conclusion

User personas show that learners have different goals, behaviours and challenges. Designing around these personas can make an online learning platform more personalized, flexible, motivating and user-friendly.
