

CAMPUS CANTEEN

PRE-ORDER APP

Order ahead • Skip the queue • Save break time

Name: Vashika Shri

Department: IBCA

Empathize - Users & Research

- *Target users: College students*
- *Students spend too much time waiting during lunch.*
- *Break time is limited.*
- *Students want faster and easier ordering.*
- *Research: interviews, surveys, observation and informal discussions.*

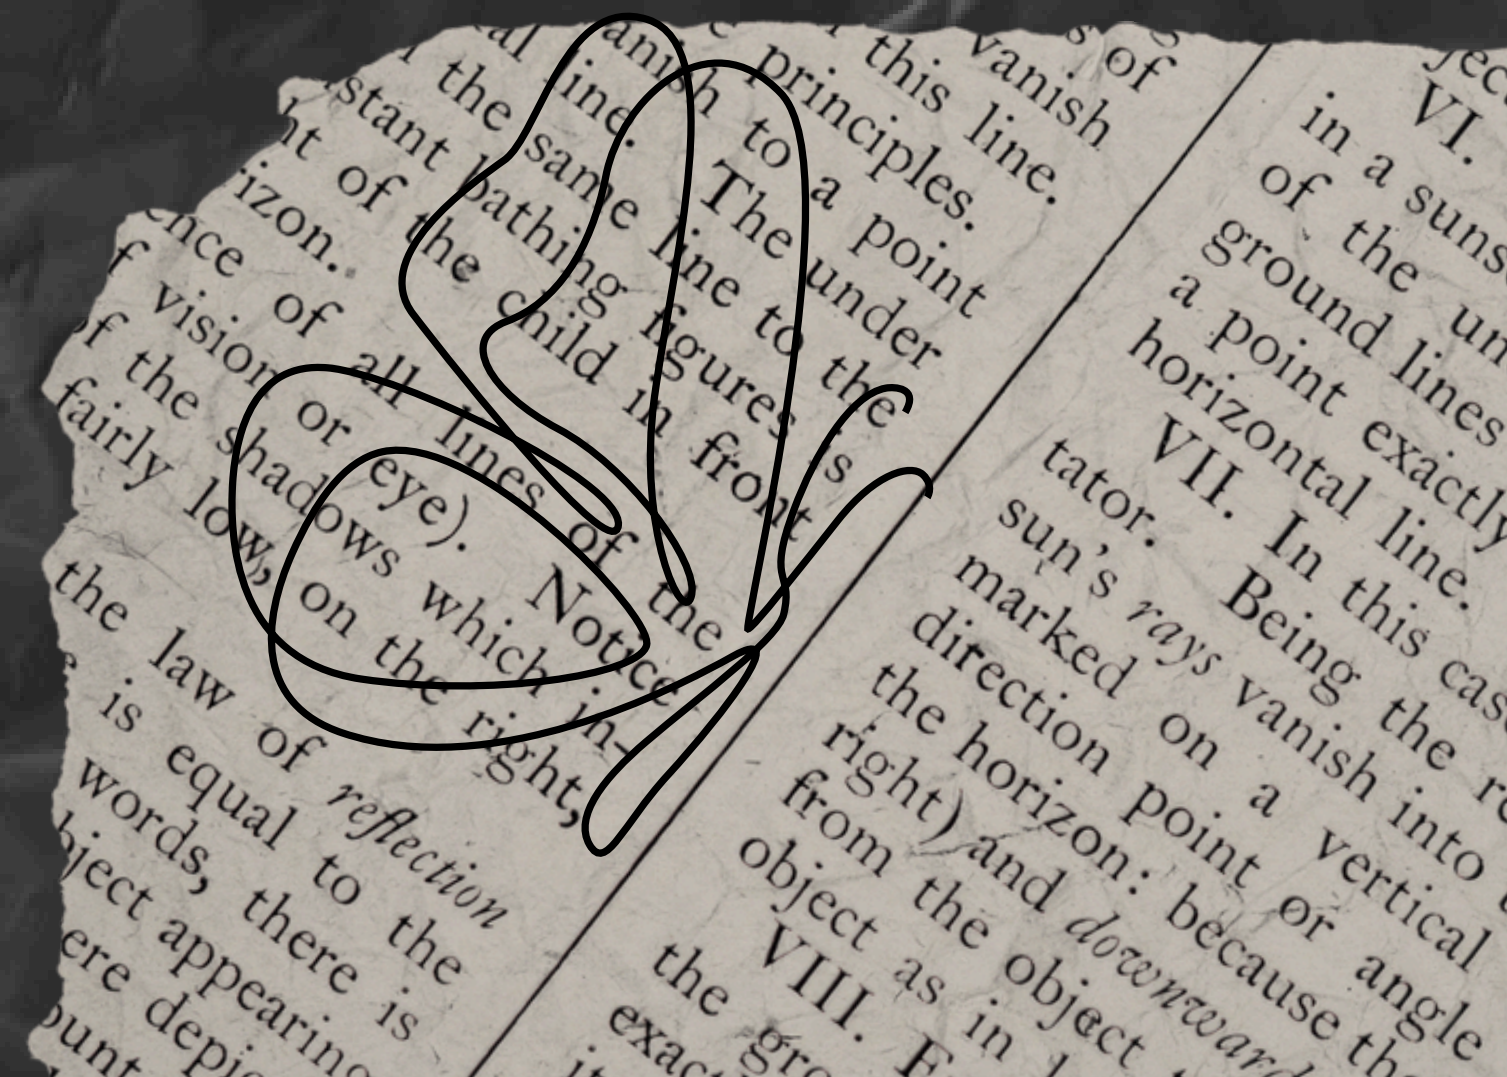

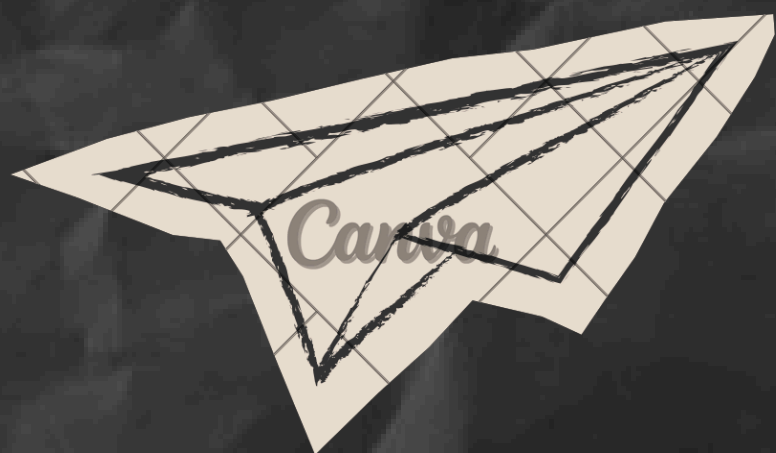

Define – Problem Statement

- College students need a way to order food before reaching the canteen because long queues make them waste their break time.
- User Need: Quick ordering and payment.
- Main Frustration: Long waiting time.

IDEATE-DIFFERENT IDEAS

1. Food-Pre ordering

2. QR-code ordering

3. Token-based ordering
system

4. Separate counter for
online order

6. Seleted solution: Campus
Canteen
Pre-Order App

5. Live queue status

and
case.

PROTOTYPE-BASIC UI SKETCHES

The background features a dark, textured surface with several pieces of torn, aged paper. On the left and right edges, there are fragments of technical drawings or maps, showing grid lines and some handwritten or printed text. The central focus is three horizontal strips of torn paper, each containing text in a black, cursive-style font.

Login-HomeMenu-Cart-Order Confirmation

Create 4-6 simple wireframe screens.

Use clear button, food categories, cart
visibility and order

Test = User Feedback

* USER1:Couldn't find cart-Make Cart more visible

* User:Menu was confusing-Add food categories

* User3:Couldn't understand order stauts -Add a stauts indicator

* Campaign setup

* *Test the prototype with 2-3 user and collect feedback*

Final Solution & Improvements

Easy food ordering before reaching the canteen

Clear food categories

Visible shopping cart

Order status indicator

Less waiting time

Result: Students can save their break time
